A Personal Message from the President of Spear & Co.

To My One Million Friends:

A SHORT TIME AGO somebody called me "The Man With a Million Friends." This seemed an exaggeration. Is it humanly possible that one man could be the fortunate possessor of a million friends?

Then I started thinking; my mind's eye looked down the long vista of thirty-five years and more. Came the realization that my friends were legion—uncountable.

For truly my customers are my friends. Hundreds of thousands of them have proven it over and over again by their constant faith, their constant patronage, and the thousands of letters they have written me.

Thirty-five years ago was a hard time for the poor man. Honesty alone would not always get him credit. He had to have possessions, security. Otherwise, when he was trusted, the credit was given suspiciously and in meager doles, and for such credit he had to pay dearly.

The average family that yearned for a cheerful, bright, well furnished home often yearned in vain. Cash Down was often the hard, harsh rule, and in a growing family money was very, very hard to save.

I was a country boy trying to make my way in a big city furniture store. I was lonesome and poor. My working hours, which ran far into the night, gave me no chance to make friends.

But these long hours did give me a wonderful opportunity to learn the fine, unselfish ambitions of the average man and woman; ambitions for their home and children.

And with this knowledge came my dream; the dream of a business—a fair, square, honest business that would satisfy the homehunger of the man rich in integrity, but poor in possessions

And so, 35 years ago I opened my modest little store here in Pittsburgh.

I, too, had but little money. My stock was small, but its quality was good. It was honest merchandise, honestly priced for honest people. My capital was largely the belief that the clean-minded fellow who played square with life, and who worked for his wife, his children and his home, would play square with me.

From the start people came into my store to buy. A few at first, but little by little, more and more until eventually the permanence of my venture was an assured thing.

In those days the credit furniture business was done entirely among poor people, people who had nothing but the bread-winner's day's pay. Other classes, store keepers, professional people, skilled mechanics and so on paid cash.

But, gradually, the Spear Way—the better way, the way to make one's money go the farthest, and the way to buy good furniture without disturbing one's savings—began to appeal to sensible people in all walks of life.

Each year brought its substantial increase in the business. The old store, the little store of hope and faith had to be replaced by a group of larger buildings. But for some time a new idea kept buzzing in my brain.

I have told you that I was a country boy. I knew that people on farms and in small places needed the Spear Way even more than the residents of big cities. I began searching for a way to serve them.

My mail order department was the result. The House of Spear became a national institution. And now, no matter where you live, you can shop from my catalog as comfortably and as satisfactorily as if you were in one of my big stores.

From a great variety of all kinds of furniture and furnishings, you can select the kind of things you like best; you can have the home of your heart's desire, on terms so easy that you will never feel the outlay. Remember, my prices are always the lowest. Everything I sell is sent on 30 Days' Free Trial in Your Own Home and my Money Back Bond protects you to the limit. You don't take a single chance when you deal with Spear.

As I have trusted hundreds of thousands, so will I trust you.

They have called me "The Man with a Million Friends," won't you be my friend, too?

This Giant Spear Institution

Brings You America's Biggest Bargains

GROVER CLEVELAND had just become President of the United States for the second time, and the Chicago World's Fair was about to open, when the first Spear store was started in a little 20-foot building in Pittsburgh. That was in 1893. Spear's working capital was very small. The business was purely local. Sales were limited.

Steadily, surely, soundly, this little store has grown until it is now one of the largest institutions of its kind in the country. Today there are five large stores with a total floor space of 450,000 square feet, and in addition, gigantic warehouses with many acres of floor space. The small capital has become many millions of dollars. From a small retail store, Spear has grown national in scope.

The mail order branch was begun in 1908. Now, not quite two decades later, it has over a million satisfied customers. Starting with a small booklet sent to a few hundred customers, we now print big catalogs by the hundred thousands, presenting the widest line of home furnishings in the U. S. A.

It may well be said that in the course of its history, Spear's has ministered to the comfort and convenience of nearly ten million people, practically one-tenth of the total population of the whole country. In every state you will find thousands of people who praise our fair and square way of doing business, who testify to the high quality of our merchandise, who declare our values are beyond compare.

Among your friends and neighbors you are sure to find Spear customers. Your Banker, Postmaster, Express Agent, Freight Agent—all know Spear. Let them testify to Spear quality and integrity. In this book you will find letters praising the quality of Spear furniture, the fairness of Spear policy. You risk nothing when you deal with Spear & Co.

We offer everyone, everywhere, an opportunity to obtain America's greatest bargains—on CREDIT—on 30 days' FREE HOME TRIAL. Old in integrity and experience, we stand behind everything we sell. Here is our guarantee, tried and true: *Satisfaction or Your Money Back.*

SPEAR'S MONEY BACK BOND

I ABSOLUTELY GUARANTEE to you that every article in this catalog is exactly as it is pictured and described — that every article is strictly dependable. I have paid careful attention to be certain that material, workmanship and finish measure up to the highest standards of quality. I guarantee further that my prices are always the lowest.

I GUARANTEE to you that every article in this catalog will be sent to you on 30 days' free trial — that you can use it in your own home and test it out in every way — that there is not the slightest risk or obligation to you in testing the quality or utility of any Spear product.

I GUARANTEE to you that at the end of the 30 days' free trial, you may return any article which does not satisfy you completely. This guarantee applies even if you simply change your mind about wanting it. There are no strings to this offer — I mean exactly what I say.

I GUARANTEE to you that I will refund your first payment and transportation charges both ways on any goods you do not wish to keep. The trial will not cost a penny. You order on trial and you test every article in your home. If you do not want it, you send it back and your money is refunded.

I GUARANTEE to you finally that under my Long Time Dignified Credit plan all transactions between you and the House of Spear will be held in strictest confidence.

In short, I guarantee you merchandise of the highest quality at the lowest price, on easiest terms, with complete satisfaction to you or your money refunded.

30 Days' Trial—Lowest Prices—Guaranteed Quality

Money-Back Bond

The foundation of Spear's success is our Money-Back Bond. In a few words, this is what it means to you: Everything we sell, we sell on 30 days' Free Home Trial. You don't have to decide to keep the goods, until you have used them for a whole month. If for any reason they do not please you—even if you merely change your mind—you may return them at our expense. We will refund your first payment and all transportation charges immediately. This guarantee holds, even though the goods show signs of use. We want you to use them. That is the only fair test of their quality. There is nothing new about our Money-Back offer. We have made it for years, and there are no strings attached to it. We live up to it to the letter, as any of our 1,000,000 customers will tell you.

Easiest Terms Ever Offered

Just turn to Page 142 of this catalog. Glance over the table of new Low Credit terms. It shows you the amount of payment with order and the monthly payments on anything you desire. You will be astonished at these low terms, which give you a year to pay—more than a year, in many cases.

Our Prices Are The Lowest

We absolutely guarantee, that for the quality offered, our prices are the lowest obtainable. We have one price to all and that price is the lowest price possible. No matter where you live, you get the same price, the same terms, the same guarantee, as if you called at one of our stores. We know that our prices are lower than the Cash-In-Advance prices you would pay in your home town stores. Comparison will convince you. We sell on small profits but in large volume. This is possible only in a tremendous organization like ours.

No Hard And Fast Rules

If you wish to send more than the required monthly payment you may do so, thus paying your account sooner. Or if you want to purchase more goods while you are paying on another order, we will be glad to accommodate you. Any time you need additional merchandise, send us your order.

Easy to Order

How To Order

We always supply order blanks with our catalogs. *Please use them.* It makes things much easier all around and eliminates the possibility of mistakes.

If you have no order blank, we will send you a new supply, or you may use plain paper or a postal card. Read the order blank carefully before filling it out, and follow all directions. Write plainly and be sure to write your full name and address. Always include your middle name—for example: Mrs. Thomas James Davis or Mrs. Martha Alice Davis. If you do not live on a railroad line, be sure to state to what shipping point the goods are to be shipped.

Always specify the finish you desire, and where an article is made in more than one size, state the size desired. After you have made out the order, check it back carefully. Make sure you have ordered exactly what you want, in the desired color or finish, and the correct size.

Be sure to enclose a money order for first payment in the same envelope with order. The table on Page 142 shows what your first payment and monthly payments will be.

We Trust You; No Red Tape

Not only do we trust you, but we aim to make our way of doing business just a friendly arrangement between friends. We haven't any iron clad, rigid rules. You can rest assured that we will do everything we possibly can to please you 100%—and more, we will do everything that is in our power to *keep* you well pleased.

If There Is No Freight Agent At Your Station

We prefer to ship your goods to the nearest station where there is a freight agent in order to safeguard you. If this is impossible, we request that you send enough money in addition to the first payment, to cover the freight. The railroads insist on prepayment of freight charges to stations where there are no agents. It is better, however, to ship goods to a station where there is a freight agent if you can possibly manage it.

How To Send Money

Make all payments by post office or express money order if you possibly can. If that is impossible, use bank draft or cash. When sending cash always register your letter. Do not send personal checks or postage stamps if you can avoid it. Post office money orders are most desirable.

Easy to Pay

We Do Not Ship C. O. D.

Under no circumstances can we ship C.O.D. Ordering on 30 Days' Free Trial, backed by our Money-Back Bond, is much more satisfactory than C.O.D. shipments, our customers say.

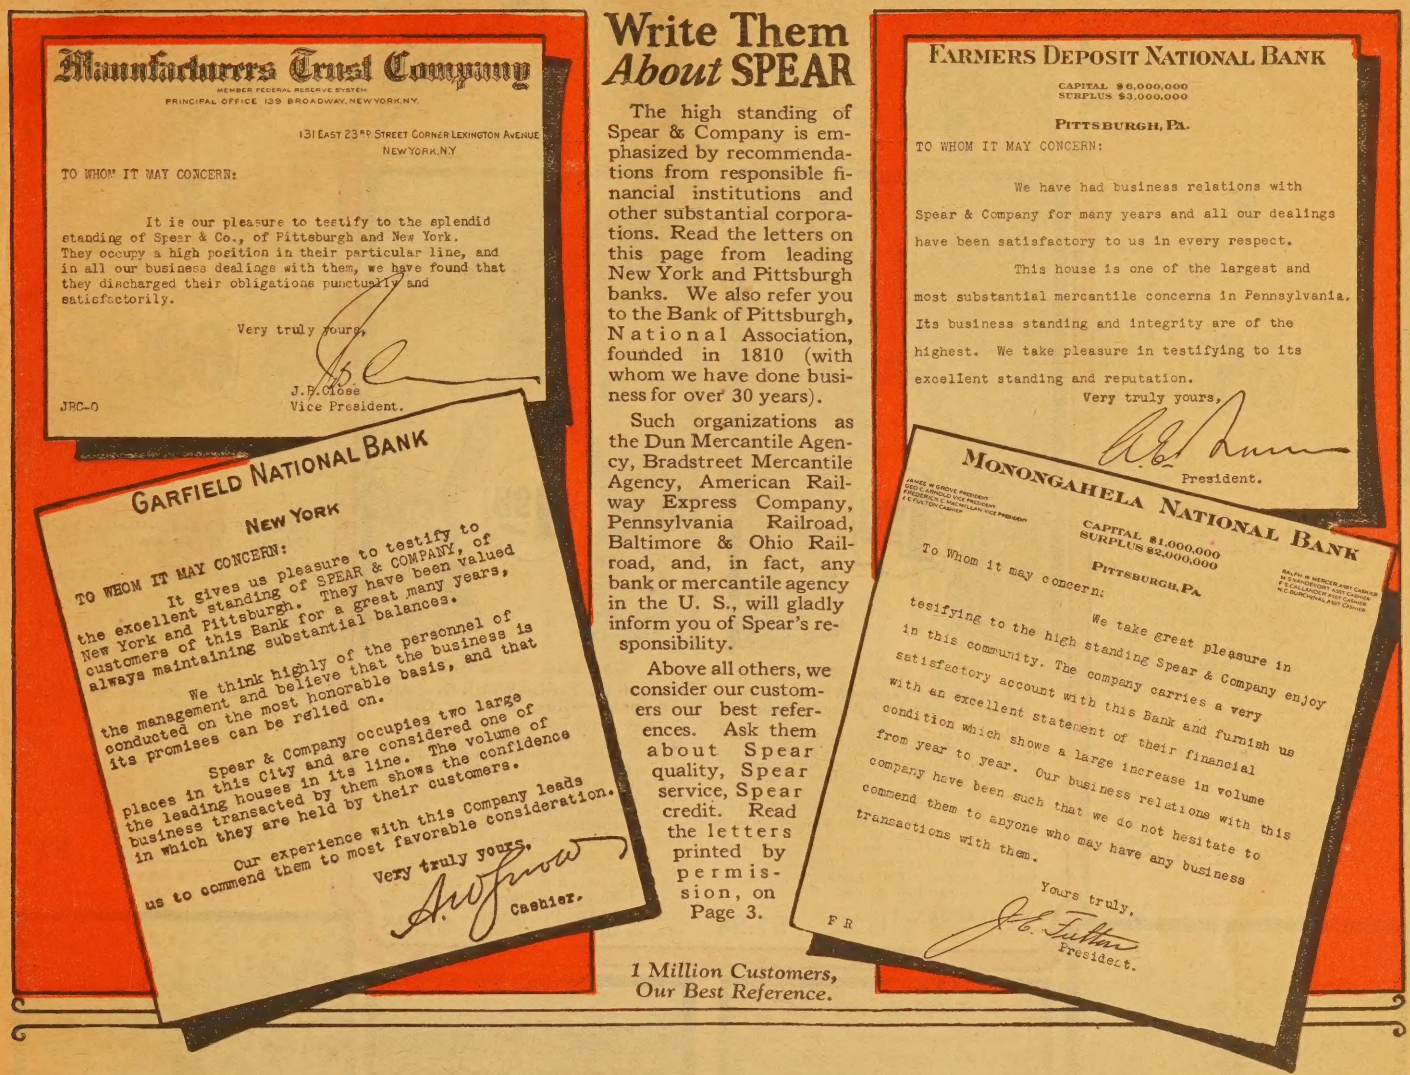

No Accounts Less Than $5.00

We do not open accounts for less than $5.00. Whenever you send an order which amounts to less than $5.00, please send full amount with order.

We Do Not Pay Transportation Charges

Any concern that "prepays freight" has to add the cost of transportation charges to the selling price. Consequently we do not prepay freight or express charges. All goods are shipped charges collect and you pay the charges to your agent when the goods arrive. This is the fairest and squarest method of doing business. As a matter of fact, the transportation charges are very low, as you will see by examining the table of freight, express and parcel post rates on Pages 139 and 140.

HOW TO ORDER (Continued From Page 6)

Examine Goods Carefully

Every shipment we make is turned over to the transportation company in first class condition. The railroad company is liable for any damage. It is best not to accept freight shipments until you examine the goods at your freight station. This does not mean that you must unpack everything. Just glance over the packages or crates to see that none is broken. If there is any damage, the freight agent is required to make a notation on the freight bill, which he gives you when you pay the charges, listing the extent of damage. See that he does so and we will then have no trouble in proving your claim. After the agent has made the notation on the freight bill, send it to us and we will adjust the matter.

We Always Ship Promptly

We are justly proud of our shipping service. Please remember, however, that goods shipped by freight come more slowly than by express. Always allow sufficient time for your goods to arrive before writing us about non-delivery. We often ship goods to you direct from the factory, especially heavy merchandise, to reduce the freight charges.

Correspondence

We are always glad to answer any letter you may write. To save you time, however, we have explained practically everything you may want to know right in this catalog. If the information you want is not given, write for it. Your letters will receive prompt attention.

Write Us Before Returning Goods

Our customers seldom have occasion to return goods, but you are at perfect liberty to do so, if you are not thoroughly satisfied at the end of 30 days' trial. Never return goods before writing us. We will send you shipping instructions, tags and complete information as to how to make return shipment. We do this so that we can identify your shipment when it reaches us and credit your account promptly.

When You Change Your Address

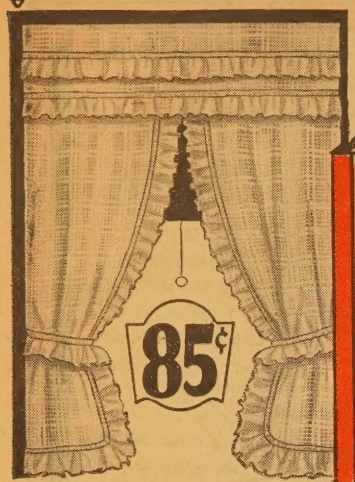

It is very important that you advise us promptly when you change your address, either from one street to another or from one town to another. Always be sure to give both the old and new address and your full name. We have 1,000,000 customers to deal with and it sometimes happens we have more than one customer by the same name. Please advise us promptly whenever you move, to avoid confusion. A letter or postal card is all you need to send.

Our Dealings Confidential

Many of our customers prefer not to let others know about their private affairs. You may depend upon us to keep your dealings with us strictly confidential. Cost of Linoleum, Congoleum Or Floor-Oleum For Typical Rooms.

We sell Linoleum, Congoleum and Floor-Oleum by the running foot—the logical, easy-to-figure way. The old confusing way of "by the square yard" is nearly always more expensive. Suppose your kitchen is 12x13 feet. You need two widths of 6-foot covering, each 13 feet long, or 26 running feet. By the old method you would have to buy 10 yards, or 30 running feet. Our way saves you 4 running feet, a saving of $1.88 or nearly 25%. See table below for cost of different water-proof coverings for typical rooms. If your room is irregular in shape, with alcoves, bay windows or a fireplace, send us a diagram, marking length and width, and showing size of all offsets. We will estimate the amount of covering required and its cost.

Size of Room	No. Running Ft. Needed	Cost, 33c Floor-Oleum	Cost, 47c Congoleum
6x10 ft.	10 ft.–6 ft. width	$3.30	$ 4.70
9x12 ft.	18 ft.–6 ft. width	5.94	8.46
12x15 ft.	30 ft.–6 ft. width	9.90	14.10

Note: If you desire seamless covering for 9x12-ft. room, for example, you can order some patterns of Gold-Seal Congoleum in 9-ft. width. You will need 12 running feet.

The Triumph Pattern. For years we have been searching for the handsomest pattern in silver plate—a pattern comparable to sterling silverware—a design that we could recommend unqualifiedly, and here it is. This Triumph design in William Rogers & Son 35-Year Silver Plate is one of rare dignity, substantial beauty and in exquisite taste. The decoration is as clear as a cameo. Unquestionably, this is one of the most distinguished patterns on the market. Made in the rich gray, Platinum-like finish, which portrays the beauty of the design to best advantage. Guaranteed for 35 years by the factory and ourselves.

You Be The Judge of the wearing quality of this silverware. Every piece perfectly plated, with an extra deposit of pure silver where most needed, thereby increasing the wear resistance materially. Imagine buying a nationally advertised set, guaranteed for 35 years—**or as long as you may use it!**—at the low price of $18.75!

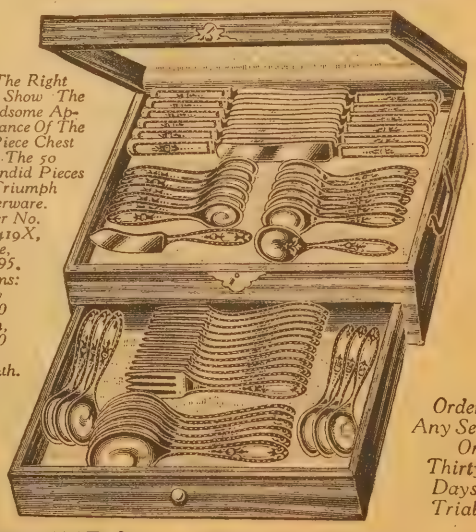

Stainless Steel Blades. The knives are made with stainless steel blades, the greatest improvement in silverware in the past 20 years. They are more expensive than plated blades, but are far more desirable, do not discolor, have a keen cutting edge, and are mirror like in finish. These stainless blades are now being used in sterling tableware, but to give our customers the best on the market, we have included them in these sets.

The 26-Piece Set is very popular—the Modern Home silver set consists of 6 dinner knives with keen edged, stainless steel blades, 6 forks, 6 tablespoons, 6 teaspoons, 1 butter knife and 1 sugar shell. Handsome polychrome border, service tray included, described above.

The 34-Piece Set. Pieces of "8" set, consists of 8 each, the ideal number for the average family. Eight dinner knives with fine stainless steel blades, 8 forks, 8 tablespoons, 8 teaspoons, 1 butter knife and 1 sugar shell. Knives have keen edge blades, easy to clean, guaranteed not to stain, rust or change color. Useful glass bottom service tray included. See details above. This set meets the entertaining requirements of homes where 12 of each piece is too many and 6 not enough.

50-Piece Set. A complete service for 12 people, including 12 dinner knives, with stainless steel blades, 12 forks, 12 tablespoons, 12 teaspoons, 1 butter knife and 1 sugar shell. With it you are well prepared for any emergency, and can set your table perfectly in one pattern. Many women deny themselves a complete service of silverware because "they believe they can't afford it." You can afford it. Pay only $2.00 cash, $3.00 monthly. With this 50-piece set, we include mahogany finish chest.

The Service Tray included with the 26 and 34-piece sets is a beautiful polychrome border, DeLuxe Service Tray, with ornamental handles and thick glass bottom. It will be put to daily use and is designed to meet the most formal requirements. We include it free, with the two sets named. Rich velvet lining. This velvet pad is removable, and tray may be used as a service tray, without it. You have 30 days' trial on any set you select, and if not pleased and convinced that our prices assure you a saving of 25 to 40%, we will take back the set, and refund your first payment and transportation charges both ways. Could anything be fairer?

A Stunning Big Buffet Of Striking Beauty. Built Of Quarter-Sawed And Solid Oak In Rich Golden Finish.

Lowest Price—Easiest Credit Terms! Only $1.00 With Order, $2.75 Monthly. Order On Trial —Take Nearly A Year To Pay.

You Save $17.50! In every respect, this buffet is a regular $45 value. No doubt you wonder how we can sell it to you for $27.45. The answer is simple, enough—quantity purchasing! If we bought only 100 or 200 buffets, as small merchants do, we too would have to pay the manufacturer a larger price and, of course, charge you more. But we buy thousands. Manufacturers compete for our business. When they sell us a big order, it means they can sell cheaper—the old story of quantity production. Manufacturing for less, they sell to us for less. Buying for less, we sell to you for less. So here you are—a beautiful Oak buffet of unusual design and finish, for $27.45. You save $17.50! Easy credit, too!

True Beauty characterizes this fine buffet. The curving grace of the mirror—the shaped bottom rail—the beveled top of 5-ply genuine Quarter-Sawed Oak—the richly carved motifs on the doors—the antique brass finish hardware—all these will delight you. Since beauty without quality is worthless, we have insisted upon superb quality and finest construction throughout. This buffet is built of Quarter-Sawed and Plain Solid Oak in rich Glossed Golden finish. All stock is specially selected and thoroughly seasoned. The top of the base is made of 5-ply Genuine Quartered Oak, with edges beautifully beveled. End panels, drawer bottoms and back are 3-ply construction. The graceful mirror of clear French plate glass measures 42x8 inches. The buffet, of course, is a big, impressive size, 48 inches wide overall and 20 inches deep from front to back.

Storage Space is essential in the well kept dining room, and this buffet gives you a world of cupboard and drawer space. There is a large linen drawer at the bottom, with two smaller drawers above. The top drawer is lined for silver, with rich green velveteen. In addition there are two roomy cupboard compartments, measuring 17x13 inches, with doors decorated by stunning carving. With all this drawer and cupboard space you will never be at a loss for convenient, dust-proof places to keep all your table linens, to say nothing of the protection the silver drawer will give your silver—the velveteen lining protecting it from mars and scratches. Every housewife will appreciate the utility of this big buffet.

Free Trial! Send only $1.00 with order. Use this buffet as your own for a whole month. If for any reason it fails to please you, return it and we will refund your payment and transportation charges both ways. If you keep it, pay only $2.75 monthly. Dellslow, W. Va.

Spear & Co.

I have bought furniture from Spear & Co. about six different times and always found the goods as represented. It is a mighty fine way for a young couple to start housekeeping.

Easy terms make it so easy, you never miss the money. I know from experience that all they want to know is that you are honest and they will do the rest. I have a cast iron range about 9 or 10 years old as good as new. All the furniture I buy from Spear is fine.

"Sleepwell"—Here's a Bargain Double Deck Coil Spring

For Real Sleeping Comfort—This Double Deck Coil Spring. Full Or Single Size.

Reduced from $17.50 NOW $10.98

The Best Bed can be ruined by an inferior spring. Without good springs, it is impossible to enjoy sound, comfortable, refreshing sleep. Here's one of the finest springs made, offered you at a reduction of $6.50.

Perfected. This "Sleepwell" double deck coilspring is of the perfected open box type, with 99 deep, resilient double deck coils. Improved helical spring construction ties the top of the coils, making a sleeping surface which conforms to every curve of the body. Spring is resilient and comfortable, while the strong construction guarantees long service. The frame is underslung, eliminating any side sway, which was the objectionable feature of the old style coil springs.

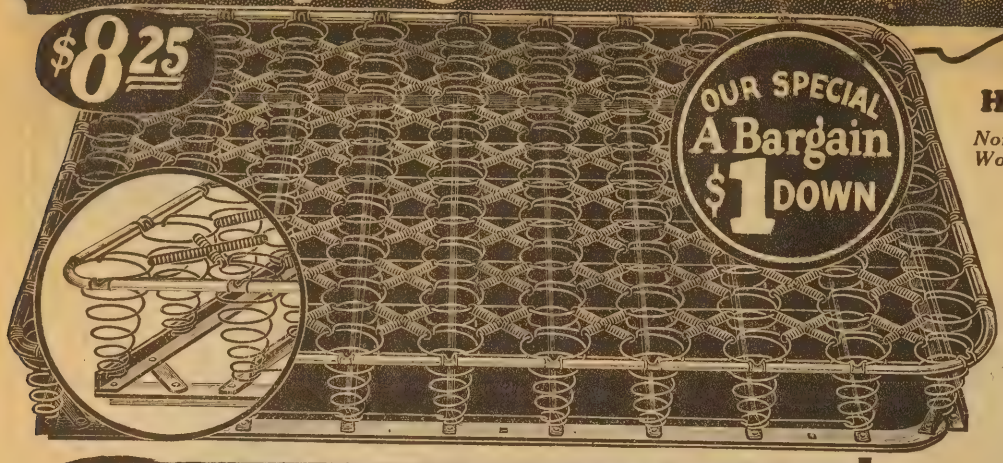

Strength. The coils are made of 11-gauge, high carbon steel Premier Wire, oil tempered, with a very heavy steel slat frame. The frame is made so that the weight of spring, mattress and sleeper rests upon the four corners where strength is greatest. The double deck coils are 8½ inches deep, with 160 small helicals tying the coils at the top. The entire spring is richly finished in Brown Enamel. It is noiseless and sagless. Never before has a fine double deck spring of this quality been offered at a price so low.

Just Like Sleeping On A Bed Of Roses—A Genuine Spring Filled Mattress—The Finest Made!

Blissful Rest. Let them talk about the deep, refreshing slumber which comes from lying on a bed of balsam boughs beneath the skies. Let the poets write about their beds of roses. But you will never know how gloriously refreshing sleep can be, until you have slept on this mattress. Balsam boughs and roses can't compare with it. It is more like sleeping on a cloud. You float off into dreamland. You awaken in the morning bright-eyed and refreshed, eager for the day's work and play. This is the finest, most luxurious mattress on the market. It is filled with hundreds of genuine Nachman spring units, enveloped in thick, soft layers of high grade, new, elastic, pure white cotton felt.

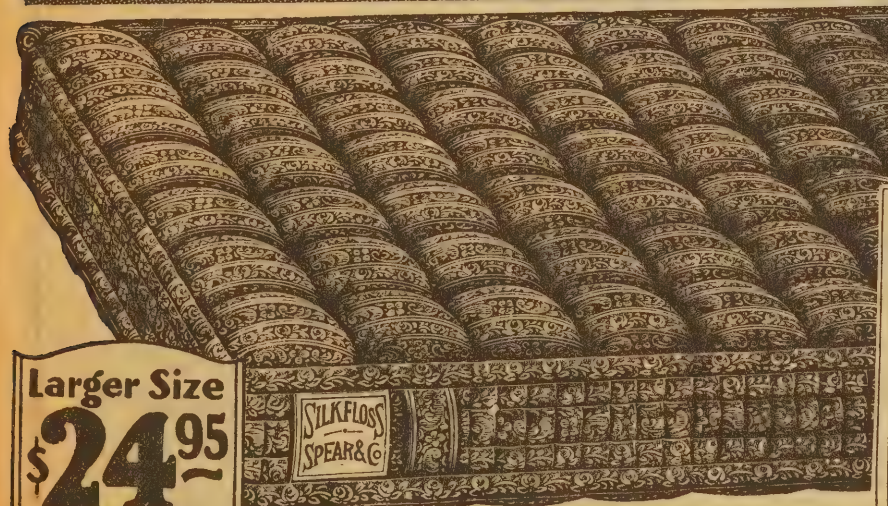

Nachman spring units are small, highly flexible coils, individually encased in burlap cells. Hundreds are used in this mattress. Each individual spring has full freedom of action. The sleeper never feels them. They cannot creak, sag, buckle, work through, or get out of place. This mattress never needs renovating, never packs down, never loses its shape. It will give you years of service.

Because the spring action of this mattress conforms to the body perfectly, the sleeper enjoys real rest. One sleeper never disturbs another by turning and tossing. The spring units, however, do not take the place of a bed spring. This mattress must be used with a regular spring. The purpose of the spring units is to give extra resiliency, supersoftness and cloud-like buoyancy absolutely unobtainable in the ordinary mattress.

Sealed Container. Each mattress is individually packed at the factory in a sanitary, sealed, corrugated container, so that it reaches you untouched—handled by no one from the time it leaves the factory until you put it on your bed. This assures a perfectly fresh, clean, sanitary mattress.

The Best Felt And Cocoa "Hair-Fibre" Mattress On The Market.

The Best mattresses are hair mattresses — elastic, supremely comfortable and made to wear a lifetime. But a first-class hair mattress is very expensive. Knowing this, we have produced the nearest possible approach to a first-class hair mattress, in this moderately priced Cocoa "Hair-Fibre" combination mattress. It is exceptionally comfortable.

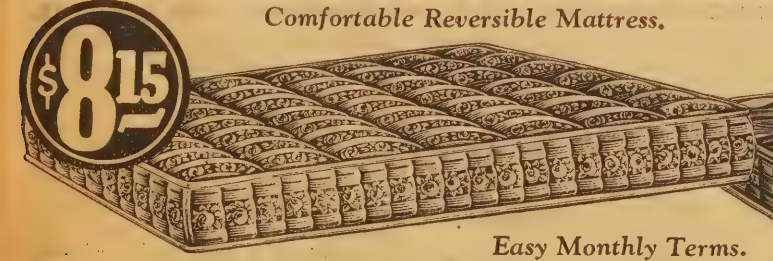

Terms: $1.00 Down, $1.50 Monthly.

The Inner Filling is thoroughly sterilized, dried, steamed, cured and curled Cocoa "Hair-Fibre," a vegetable product of great elasticity. Top, bottom and edges are covered with extra layers of clean, new, felted cotton, so the mattress can be used either side up. The downy fibres of cotton stock are fleeced and spun, elastic, light and airy. This mattress is not stuffed; it is built up, layer upon layer, by the most improved filling machinery. The contents are sterilized and guaranteed absolutely pure and clean. The factory making it is equipped with the most modern machinery, enabling the manufacturer to produce a greatly superior mattress at a lower price than ever before.

Heavy Art Tick in a dainty floral and stripe pattern makes the covering. Tufted both top and bottom to prevent matting or lumping. This mattress is made with a high roll edge and hand loops on the sides for convenience in turning. It weighs 45 pounds in the full size and is a full inch thicker than ordinary 50-pound combination mattresses. At our price of $14.95 this mattress offers you the comfort and durability you would expect from a much higher priced hair mattress. Your payment and all transportation charges refunded if you are not delighted. Shipped from Pittsburgh warehouse, carefully packed.

The Bed Is A Beauty! It is made of cold rolled steel with continuous posts, measuring 2 inches in diameter, and ½-inch round fillers. The head board is 48 inches high, the foot board 33 inches. The appearance of the bed is richly enhanced by beautiful decorated steel cane panels, 6 inches wide. The decoration is a stunning raised vase and floral design in full color. This bed is furnished in either Ivory or Brown Enamel finish. Both are exceedingly attractive—and, furthermore, guaranteed not to flake, chip or peel. Be sure to mention finish desired. Bed comes in full double size only, 4 feet 6 inches wide. It's built to last for years.

The Mattress— big and buoyant—is especially designed for comfort. Actual weight, 45 pounds! The soft, springy, cushion-like body holds its shape indefinitely and always retains its soft resilience. Sanitary cotton forms the center. On top, bottom and ends, there are layers of felt, deeply tufted to prevent lumpiness. The shape retaining rolled edge adds greatly to the neat appearance of this mattress. The covering is durable floral ticking in a dainty blossom pattern in pink and blue. Here's a mattress that's good to look at, glorious to sleep upon, always comfortable. You'll be delighted with it.

The Sturdy Spring is made of genuine Wishbone Steel Fabric. It is especially comfortable and restful. It is made in one piece, attached to the end angles by a full set of oil tempered helical springs. Sturdiness is doubly assured by the special third bracing rail in the center of the spring. This bed does not have separate side rails. Instead they are attached right to the spring, a much more satisfactory method of construction. This spring is enameled finished, giving it a rich, handsome appearance.

Steel Beds are good looking, sanitary, easy to clean and easy to move about. They are much cheaper than the old style wooden beds and, we may add, much more sanitary. Last of all, they are practically indestructible. In addition to all of these features, this bed offers you an up-to-the-minute touch — stunning steel cane panels. Naturally we've insisted upon an equal degree of class and comfort for the spring and mattress. We've never offered you a better value in a steel bed outfit. Take advantage of our new low price!

Georgian Tubing. This bed is the product of the Greenpoint Metallic Bed Co. You know what that means. Greenpoint beds are advertised in all the leading papers and magazines. They're GOOD. There's nothing like a steel bed—light in weight so that it is easy to move about— easily cleaned—wearing far longer than wooden beds. Georgian tubing is used to make this bed. It is much handsomer than the old style round or square tubing. Exquisitely shaped and beveled. One piece of seamless Georgian tubing forms the continuous main posts and it's most attractive.

Up-To-The-Minute. They don't make steel beds any prettier or more stylish than this one. Solid steel center panels, 11 inches wide, decorated with baskets of rose and blue flowers, are set off by round fillers. The triple baked Walnut Brown Enamel finish harmonizes with any furniture—Oak, Walnut or Mahogany—and cannot chip or peel. The bed is made of cold rolled steel, electrically welded for lifetime service. It measures 4 feet 6 inches wide, full double size—large enough for two adults. The head board is 50 inches high; foot board, 34 inches, including the easy rolling casters.

Comfortable Spring. Heavy malleable corners and a high grade fabric steel body, make this spring strong, resilient and noiseless. At each side, 1¼-inch steel bands, supported by two extra strong, helical coils, provide non-sag construction. The body of the fabric is 5 inches above the side rails. At each end 30 helical coils fasten the spring to the sturdy angle iron frame. Here is a spring that spells sound "SLEEP"—it's the last word in comfort.

Buoyant Mattress. The 45-lb. mattress contains a cotton center, covered on all sides with pure layer felt. The soft, springy, cushion-like body retains its shape indefinitely. Always comfortable and resilient! It is deeply and firmly tufted and there is a shape-retaining rolled edge. The cover is a durable floral ticking in blue, pink and complementary colors.

Bed Only. You may buy the bed separately if you wish. Full size only, furnished with reversible, heavy, angle steel side rails, so you can use any spring. A real bargain!

The spring fabric is made of double lock wire, thoroughly tempered, resilient, restful, noiseless and comfortable. At each end there are 29 powerful helical coil springs, which fasten the fabric to the angle ends of the spring. Fabric and ends have rust-proof galvanized finish. This outfit does not have separate rails. Instead, they are attached right to the spring, a very convenient, satisfactory and improved method of construction.

Spear & Co. wants to enable every customer to own this outfit, to enjoy its benefits. That's why we've made new credit terms on it—lower now than ever before—only $2.00 with order and $3.25 monthly. And we'll send it for you to use, as your own, for a whole month—at our risk! A bargain you can't beat—a Greenpoint steel bed, in True-Grain Walnut or Mahogany finish—a 45-pound "Downy-Ease" mattress, and a strong, resilient spring—all for $39.95!

Famous Georgian Tubing. Steel beds have sprung into popularity in no time, because they are beautiful, inexpensive, hygienic and light in weight. You can't buy better beds than Greenpoint makes. This design is a new one, made exclusively for us. It features the famous Georgian tubing. Molded posts are all the rage now, and Georgian tubing is the loveliest of all. Exquisitely shaped and beveled, it is much handsomer than the old style round tubing. In this bed the continuous posts are made of seamless 2-inch Georgian tubing. The solid 13½-inch center panels, in stunning two-tone effect, richly decorated with gold embossed metal baskets of blue and rose flowers, have modish steel cane corners. Note the unusual design of the panel, the rich ebony and gold line trim. Medallion set on ebony background with gold outline. Ebony lines also enhance the beveled edges of the Georgian tubing. On either side of center panel there is a 6-inch panel of steel cane. The head stands 50 inches from the floor, the foot 35 inches, including the easy rolling casters. The bed is 4 feet 6 inches wide—full size for two adults. It is made of cold rolled steel, electrically welded together, constructed for lifetime service.

Choice of Finishes. You may choose between True-Grain Walnut or Mahogany finishes. Each matches perfectly the color and grain of the real wood, harmonizing exquisitely with genuine Walnut or Mahogany wood furniture. Most women today prefer a steel bed in walnut or mahogany finish, to a bed made of the woods themselves. The steel bed looks just like the wood, it is infinitely more sanitary, lighter in weight and easy to move about, and it can be cleaned by running over it with a damp cloth. This is the most sanitary, serviceable bed you can buy. Steel beds, as you know, are practically indestructible.

The Mattress. You can't be comfortable if you haven't a superior mattress, a mattress that affords refreshing, health-bringing slumber. Here is one that will astonish you by its excellence. It weighs full 45 pounds. It is built up, layer after layer, of new, high grade felt, using only the very best of clean new stock. The covering is a beautiful, firmly woven, long wearing, floral ticking in shades of blue and rose. This mattress is made with a rolled edge, it is deeply and evenly tufted, and all four corners are deeply stitched for extra strength. Convenient hand loops make it easy to handle. You needn't dread the job of turning it.

Made by Special Process. So much for what appears to the eye. But here's the real secret of its quality and durability. It is made from the cleanest and best raw materials obtainable. In the process of felting, the mazy, filmy webbing is handled by highly specialized machinery and skilled operators, in a manner which keeps it uncontaminated by dust and germs, and obtains absolute uniformity of thickness. The successive layers of felt are piled and then pressed together with such care and scientific precision that these mattresses never get hard or lumpy, even after years of use. Scientifically designed—made under most sanitary conditions—to safeguard your health! Makes sleep doubly deep and refreshing!

The Spring. The spring is of the spiral coil, wire tie top type, considered the best on the market. It is made with 88 resilient coil springs of genuine Premier wire of highly tempered quality. These coils, which are 6½ inches deep, are tied at top and bottom with a network of steel wires, forming a resilient, everlasting sleeping surface that conforms to every curve of the sleeper's body. The frame of the spring is reinforced with heavy steel bands. This construction holds the coils in position perfectly, making the sleeping surface buoyant, noiseless and long wearing. The rails which are made of angle steel, lock securely into hooks on the corner posts of the bed. The entire spring is richly finished in brown enamel. It is guaranteed to be absolutely noiseless and it will never creak, "buckle" or sag.

Just read the detailed description below and you will agree with us that this is just the suite for your own home.

Fine Quality. These pieces are light and easy to move about, do not show dust, and are easy to keep clean. The velvety smooth Reed Fibre is tough in texture, will wear indefinitely and is woven over hard maple frames. The five pieces shown here are sufficient to furnish a living room comfortably. The construction is all you would expect in higher priced living room furniture and insures maximum comfort.

Two Finishes. You have your choice of Rich Nut Brown finish, in which color the pieces are shown, or jade green with orange background and black trimming, the exquisite color combination of which a small section is illustrated at the bottom of the page. These finishes are most attractive and will harmonize with any furnishings. They provide an ideal setting for the bright colors of the cretonne.

The Covering is serviceable cretonne in a floral pattern of blue, rose, tan and green on a warm tan background. This cheerful color combination is most pleasing and attractive and is well adapted to the handsome finishes in which this suite is supplied.

The Davenport is 70 inches wide over all, an unusually large size. The seat, between the arms measures 60x21 inches, the back is 27 inches high. It is made with three comfortable, thickly padded, removable, automobile type cushion seats. The cushions, which are deep and thickly padded with the finest upholstering materials are made with nine coil springs to each cushion, or 27 in all, supported by steel bands. This is one of the finest types of seat construction, guaranteeing perfect comfort and relaxation. These cushions have a fine, deep, attractive look. No suite could be made with greater care. Davenport has popular fan-shaped back. Shipping weight, 60 lbs.

Chair and Rocker are both 28 inches wide over all. They have roomy comfortable seats measuring 19x19 inches with 6 coil springs supported by steel bands. The removable automobile type cushions have a most attractive tailored appearance that is very smart. They are well padded, shape retaining and particularly comfortable. Height of back from seat is 27 inches. Attractive fan-shaped back and semi-roll arms. Shipping weight of chair and rocker, 30 lbs. each.

Graceful And Fashionable—Strong And Durable. High Grade Loom Woven Fibre Suite In The Stunning Cafe-Au-Lait Finish. Colorful Cretonne Coverings And Graceful Blue Diamond Decorations.

For Fashion, for charm, for service—this is the suite chosen by clever women who want something above the average. Loom woven fibre furniture is much finer in weave than the ordinary fibre furniture. The surface is smoother and takes a better finish. It costs a little more, but its superiority in every way compensates you a thousand times over for the small additional outlay required to own it. This suite will bring a truly indescribable color and charm into your home. It is suitable for any room—living room, sun parlor or porch. The graceful lines, the unusual decorations, the colorful cushions, possess an air of real distinction. Best of all, this is a suite which will stand up under hard usage and give splendid service for years.

Special Attention is given to the construction of this suite. A few of the details will give you some idea of its superb quality. The frames are made of the best second growth ash. All cushions are of the automobile type and are removable. Each cushion is made with nine deep, resilient coil springs, supported by steel bands. This means nine springs in chair and rocker, and 27 in the davenport, making a strong, buoyant seat construction which will give you the utmost in comfort. Careful execution in all details of manufacture assures a suite that will not only retain its splendid appearance, but one that will stand up under constant service almost indefinitely.

Easy to Handle. Fufniture of this character lightens the housekeeper's burden considerably. It is light in weight, and easy to handle, and the cushions can be removed to dust and clean. Fibre furniture is being used more and more for the living room in all of the better homes. It has a distinctive charm that will endear itself to you more and more as time passes.

Finished In A Beautiful Cafe-Au-Lait. This Is A Rich Warm Tan Color, Well Adapted For This Suite.

The Davenport really furnishes the background for the entire suite. This one is 60 inches long (between the arms); over all it measures 72 inches. The seat is 21 inches deep and the back is 19 inches high from the seat. These proportions assure you the maximum of comfort. It is a most attractive piece of furniture. Note the pleasing effect the handsomely shaped front apron and cleverly braided edges create. The back is decorated with three diamonds stenciled in blue, and the semi-roll arms add a very pleasing touch. There is an attractive diamond shape decoration stenciled in blue on the front of apron also. The three removable cretonne covered cushions are built to retain their shape. Shipping weight of davenport, securely packed, about 60 pounds.

The Chair and Rocker are identical in size and construction. Each has the auto type removable spring cushion. The height of back and size of seats are ideal for comfort. The under construction is of ash and is very strong and rigid. The seat is 19 inches wide and 19 inches deep. The back is 20 inches high above the seat. Over all they are 30 inches wide. They are charming pieces and like the davenport have semi-roll arms, shaped front apron, braided edges and diamond shaped decorations. Shipping weight of each, about 30 pounds.

The Covering. The beauty of the pieces is further enhanced by the attractive, serviceable cretonne covering—a rich harmoniously blended floral pattern, with rose, taupe and blue colors predominating on a black background. These colors contrast beautifully with the cafe-au-lait finish of the fibre, giving any room a cheery atmosphere.

The Table is made over a well braced frame of ash. The legs are closely wound with fibre and the table is rigidly reinforced by two stretchers. The round fibre top measures 25 inches in diameter, and the table stands 28 inches in height. It is decorated to match the chair, rocker and davenport and can be bought separately. It is just as carefully constructed as the other pieces. Shipping weight, 35 pounds.

Real Quality predominates in this suite, but we have kept the price low. The ordinary store could not sell this suite under $90.00, but our enormous buying power and small margin of profit assures you a saving of fully $30.00. We have impressed upon the manufacturer that in this furniture only the very best of materials must be used, and you will find it one of the best investments you have ever made.

Order The Suite complete or any pieces you desire. It will be to your advantage, however, to buy it complete—chair, rocker and davenport. We make a reduction on the suite complete—about $4.00 less than the price of the pieces individually. At the end of 30 days, if you are not completely satisfied, you may return the suite and your first payment and all transportation charges will be returned to you. All pieces shipped from Pittsburgh.

Newest Of The New—The Consolette! Graceful, Symmetrical, Beautifully Decorated. Mahogany Or Walnut Finish.

A Happy Thought inspired the designer who planned this New Consolette. The entirely new style cabinet bids fair to revolutionize the entire phonograph industry, combining as it does, the undeniable style of the console type with the convenience and compactness of the upright model. The Consolette's grace of line, its perfect proportion, defy description. Only when you see it can you appreciate the perfection, the loveliness and charm of this exquisitely made instrument. It has taken the country by storm. It's NEW—decidedly different!

Ideal Size. The Consolette is an ideal size—large enough to accommodate the perfected, deep-throated Mello-Phonic tone chamber—large enough to allow plenty of storage space for records, and at the same time well proportioned for the small home. The most widely advertised talking machine on the market today is of the Consolette type, and a similar size and quality to our Mello-Phonic sells everywhere for $100 to $125. Buy from us and you get equal quality and style, perfect reproduction and rich tone, and save nearly one-half! Easy credit terms, too!

Perfected Reproduction. It is hardly necessary for us to tell you that this is a splendid instrument, finely made, capable of perfect reproduction. It is a Mello-Phonic, and when we have said that, we have told you the story. As you know, the New Mello-Phonic is noted for the new type of reproducer it has perfected. The long, deep tone chamber, scientifically designed, made of selected woods, chosen for their sound-reproducing qualities, and the perfected tone arm, give you that new tone—full, rounded, marvelously distinct and clear. Simply by opening or closing the doors, you can have any volume of tone you desire, from the saxophonic syncopation of a jazz orchestra to the soft, sweet, plaintive notes of a violin. Here is melodious perfection in all its glory!

Open View, Showing Grill Front Tone Chamber.

Two Finishes. This new Consolette is splendidly constructed, with front and top of 5-ply genuine Mahogany or Walnut veneers in exquisite hand rubbed finish. Ends and back of finest selected hardwood, richly finished. The panel above the doors is enhanced by a dainty oblong floral medallion decoration in rich natural colorings. The doors, too, are decorated with a large oval medallion in shades of gold, rose, ivory and green. The motor is the highest quality, double spring type, noiseless and non-vibrating. It will play six 10-inch records on one winding, and plays any disc record made.

Dimensions. This instrument stands 38 inches high, just the right height for a consolette model. It is 19½ inches wide by 20 inches deep. Two removable needle trays and generous supply of needles included.

At The Left the New Consolette is illustrated with self-adjusting lid raised and doors open, revealing the grill front tone chamber and the roomy record compartment below. Note the slender, graceful lines of this beautiful cabinet, its perfect symmetry, its delightful proportions. Note, too, the simplicity of design, the dignity of its construction, with the beautifully shaped lid, the graceful Tudor style legs and stretchers. Nowhere else in this wide world can you possibly buy so beautiful, so mellow-toned an instrument at such a low price—only $47.85. It's a regular $85.00 value. Our price saves you $37.00. The Bed Davenport fulfills two purposes—gives you service 24 hours a day. By day it is a perfectly stunning davenport. No one would ever guess that it can be transformed, with one easy motion, into a comfortable, full size, double bed. It is a large size davenport, 79 inches wide overall and 75 inches wide between the arms. The seat construction contains 48 Premier, high tempered, steel coil springs, supported on a spring steel understructure. These deep, wide coil springs are overlaid with an abundance of sterilized flax fibre and sanitary new felt cotton. Here's your assurance of resilient comfort! To make assurance doubly sure, and comfort doubly delightful the three loose cushions each contain 49 fine wire spring units of special construction. They never sag or lose their tailored appearance. Note also the two extra oval cushions which match the upholstery and are included with this suite. At night, when you transform this davenport into a double bed, you do not sleep on the upholstery. There is a separate sagless cable fabric spring, superbly comfortable. Bed section when open is 72x50 inches.

The Chair and rocker have most attractive cane panel backs. They are big, roomy chairs, 25 inches wide overall, with seats 20x20½ inches. The same superior construction is used in the chairs as in the davenport. In the seat of each chair there are 9 coil springs and each cushion contains 30 fine spring units of special construction. Chair cushions are removable.

Illustration To Left Shows Davenport Open, Ready For Use As Full Size Bed Measuring 72x48 Inches.

Save Money. One of our lowest priced Bed Davenport Suites. Has all the comforts and conveniences of our higher priced suites, though not quite so massive. It will give excellent service.

Three Finishes. This Colonial design has wide posts, made of 3½-inch stock; curved top rail, colonial roll arms and feet. Made of solid plain oak in highly glossed Golden or nut Brown Fumed Oak finish, or of selected hardwood in attractive Birch Mahogany finish. State finish desired.

How To Operate. Davenport opens with one easy motion into a full size comfortable bed, large enough for two people. A child can handle it easily. The upholstered seat turns completely over and on the under side is a sanitary steel fabric bed spring. You do not sleep on the upholstery. Pillows and bed clothing are concealed all day, out of the way, inside the davenport. We recommend that you order felt mattress, No. B1344, made to fit interior of davenport, Priee, $8.95—all sent on 30 days' trial.

Outer Coverings. You have your choice of four outer coverings. The Imperial artificial leathers are a good grade for the price. We particularly recommend the Muleskin artificial leathers which are thick, pliable, will not crack or peel, and wear better than genuine leather.

The Davenport when closed, measures only 60 inches wide and takes up but little wall space. Width between arms is 52½ inches. When open it makes a full sized bed, 72x48 inches, large enough for two people. The Davenport is a handsome settee by day and a full sized bed at night. The non-sag seat is built over 24 deep, upholstery coil springs covered with duck canvas and filled with tow and felted cotton. An extra bed like this is always handy, for regular or emergency use.

The Chair And Rocker are well built, comfortable pieces with attractively designed frames and full closed side panels. Also furnished in your choice of three finishes to match the Davenport—golden or fumed oak, or birch mahogany. The seats are made with six resilient upholstery springs, covered with sanitary upholstering materials, and are of non-sag construction. Both pieces measure 26 inches wide over all. They are handsome, comfortable and serviceable.

Here is a suite that will make your living room more inviting, more pleasant, and a cozier room for family and friends. You will take great pride in the splendid design.

The Complete Suite is much more desirable than similar suites on the market because it contains three big chairs and rockers—the average suite contains only two, with two smaller pieces. The large arm chair, and the two arm rockers are very comfortable and desirable, and will furnish your living room most attractively. In addition to these three pieces, the suite includes a library table, taboret and waste basket. The table serves a double purpose, that is, library table, and desk. All pieces are made of solid oak, air seasoned and kiln dried, finished in your choice of highly glossed golden or brown fumed oak. The Table is very gracefully designed and most complete. Measures 24x36 inches, has roomy magazine and book racks at either end and most important of all, the writing desk drawer, which is an exclusive Spear feature. The Rockers and arm chair are 36 inches high and have seats 19x19 inches. The seats and backs are of shape retaining, non-sag construction, are well padded and covered in a durable grade of brown Spanish artificial leather. The wide arms and heavy front posts give them a massive appearance, artistically set off by the graceful top and front rails. These two arm rockers and the arm chair are built for solid comfort, are fine looking pieces, large size and neatly finished.

The Taboret has a top measuring 11x11 inches and is 16 inches high. A well made durable piece and an ideal stand for flowers, plants, etc. The waste basket is 14 inches high, 10 inches long and 10 inches wide. It completes the suite, every piece of which is practical, dependable and solidly constructed.

Special Features That Keep Food Ice Cold and Bone Dry

System Of Refrigeration

The arrows indicate the direction of air currents. The warm air passes over the provision chamber to the highest point over the ice chamber, flows over the mass of ice, then passes under the galvanized steel ice rack. It finally flows down the cold air flue, into the bottom of the provision chamber, which is rapidly and completely filled with cold air, keeping your food in the best of condition.

Patented Sanitary Glass Trap

This well constructed glass trap prevents outside air and odors from coming into the refrigerator. Its advantages over metal traps are:

1. Non-rustable; non-leakable.
2. Being transparent, sediment which collects can be removed before the trap becomes clogged.
3. Almost unbreakable.
4. Dirt from the ice will not cling to it as to metal, and this way it can be easily kept sweet and clean.

Refrigerator Construction

Construction — made of thoroughly seasoned, kiln-dried, selected hardwood, finished in English Oak. Ice chamber is lined with galvanized steel. It contains 7 insulating walls, the outer case, waterproof sheathing, a thick layer of mineral wool, another waterproof sheathing, air space, inside case of matched wood, galvanized steel lining. Furnished In Golden Oak Or All White Enamel Finish, Both With Sanitary, Easy-to-Clean, White Enameled Interior. A Food Saving, Efficient Refrigerator. Order On 30 Days' Trial.

The "Iceland" is just the sort of refrigerator every housewife wants in the home. It has all the latest scientific improvements, combined with the newest style and finest construction. It is made of thoroughly weathered and kiln-dried Northern Ash, and is finished a lustrous English Oak or All White Enamel. Furnished with or without water cooler tank, faucet and tumbler holder.

The Insulation is of pure, clean, odorless mineral wool. Mineral wool is a soft, fibrous, pliable, elastic substance with tissues crossing and interlacing in every direction. The contained air is held "still," making a perfect non-conductor of heat—an important feature in refrigeration. The front apron at the bottom may be raised to accommodate a large drip pan.

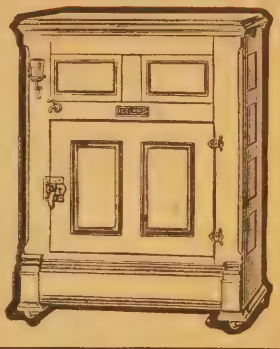

The Hardware and the trimmings are of solid bronze, silver nickel-plated finish, giving the refrigerator a pleasing appearance. Shelves are heavy silver-tinned wire mesh.

This Refrigerator has a new style provision chamber, so constructed that there are no wooden sills for absorption, no joints to collect moisture or to secrete drippings of food or fluids, no soldered joints to break. Absolutely sanitary. Interior is white enamel, baked on, and will not peel or crack. The heavy glass trap is another advantage. Easily cleaned, never rusts and prevents outside airs and odors from getting into the refrigerator. Can be easily removed for cleaning.

The Ice Chamber is constructed entirely of metal, with solid ice pan corners, and can always be kept sweet and pure; it is far superior to ice chambers with wood corners which give off disagreeable odors after they are saturated with water. The ice chamber is lined with galvanized steel, with ice pan of one sheet of solid metal. This method of construction is covered by our solid ice pan corner patent.

An Ice Saver. This refrigerator contains seven insulating walls: the outer case, waterproof sheathing, a thick layer of mineral wool, another waterproof sheathing, air space, inside case of matched wood and white enamel galvanized steel lining. From this you will note that our "ICELAND" refrigerators are better insulated than others, and consequently better preservers of food and ice. **Order a refrigerator large enough to meet your requirements. A large size is more economical, and uses less ice in proportion than a smaller size.**

White Enamel Finish.

Two Styles—With Or Without Porcelain Lined Water Cooler. Choice Of Five Sizes. Be Sure To Order A Refrigerator Amply Large For Your Requirements. The Larger Sizes Conserve Ice!

Water Cooler. This fine refrigerator is furnished with or without the sanitary, non-rusting water tank. The water tank is porcelain lined, and not only keeps the water cool but insures its purity and freshness. Connected by rust-proof pipe to convenient nickeled faucet and tumbler holder at front. This is a convenient arrangement, requires no additional ice, and insures cold water at all times—a most desirable feature.

Two Finishes. This refrigerator is furnished in either All White Enamel finish inside and out, or Golden Oak finish with white enamel lining. An ideal refrigerator, in every way. State finish desired. See table below for prices on all sizes and styles.

We Sell our refrigerators on very liberal terms of credit. If at the end of 30 days of trial and use in your home, you are not perfectly satisfied in every respect, you may return the refrigerator and your first payment and all transportation charges will be refunded. Shipped from Pittsburgh warehouse or from Central Wisconsin factory. **We always advise the purchase of a refrigerator a little larger than required, as they are better preservers of ice and food. Your satisfaction will be more complete with a refrigerator that is a little too large than with one that is too small. Overcrowding the food chamber wastes ice. Many combination gas and coal ranges are made with combination ovens for both fuels. Usually they are quite complicated and require a lot of effort to operate. This stove, simply constructed, is ready for instant use with either gas or coal and its cooking and baking qualities with both fuels, are unexcelled.

Special Terms: $5.00 Cash With Order, Balance $7.00 Per Month. Fine For Winter Or Summer Use. Great Value.

Well Made. The castings on this range are of the very same heavy iron as those used on the very best stoves. The steel body and high oven are new process, copper bearing, rust resisting blue steel, electrically welded. There is a heavy band of iron around the bottom, a cast shoe on the flue back. Cast flue strip, asbestos lined oven top and flue bottom, triple built body, cast fire and ash door frames, braced oven bottom. These details may mean little or nothing to the average reader, but they indicate to the expert that this range is made to give a lifetime of service.

To Cook With Coal you have a six-hole cooking surface fitted with 8-inch lids. The coal fire box measures 16 inches long, full size, has corrugated iron liners and duplex grates which will burn hard or soft coal and wood.

To Bake With Coal you have the lower oven which measures 18x18x12 inches, is braced with cast iron to prevent warping and has wire oven rack. Oven thermometer gauges heat accurately and assures perfect baking.

To Cook With Gas you have the three burners on the main top fitted with removable open grates. More than enough room for preparing an entire meal easily.

To Bake With Gas. The high closet has a combination gas baking and gas broiling oven on the right hand side which measures 18x15x9 inches. It is equipped with two burners, one of which is placed below the oven and controlled by the lower handle on the right hand end of the warming closet. To bake with gas you light this burner. To broil with gas you light the upper burner. The gas oven is equipped with electrically welded racks, steel linings and white enamel broiler drip pan. It bakes and broils perfectly. Compartment at left of high closet is a large warming oven.

Beautiful Trimmings. This range is trimmed with beautiful, lustrous silvery nickel trimmings, including front legs and front base strip, fire and ash pit doors, cleanout door, oven door frame, gas pipe, warming closet brackets, trimmings and warming closet door frames. These harmonize perfectly with the handsome white enamel parts of this range including the oven door panel, the warming closet door panels and the back splasher. There are very few ranges that are so sanitary and easy to keep clean and which will look so fine in the kitchen. The Plymouth is positively one of the best combination coal and gas steel ranges on the market.

Remember this range has a separate oven and broiler for gas at the top, a coal oven below, three gas burners for cooking and a six-hole cooking surface for coal. No complicated parts, no trouble or effort to use. Combines the best features of a high-grade coal range and a separate gas range.

Try It 30 days in your own home. If not satisfied, we will refund your first payment and freight charges both ways. Large size with main top measuring 42½x23 inches. A heavy range, weight 400 pounds. A Supremely Satisfactory Oil Range, With Two Giant Burners And Double Row (Six) Cooking Holes. Built-In Oven On Right Or Left Hand Side. Dandy Cooker And Baker! A Bargain!

Keep Cool! Give your family nutritious hot meals all summer—prepare them on this "Oil King" Range in a cool, comfortable kitchen. Put up jams, jellies and preserves—canning is no job at all in a cool kitchen, with an efficient oil range like this.

The Year Around you will use this oil range. You'll use it during warm weather because it keeps the kitchen cool. You'll use it the rest of the year because it is so quick, so clean, so economical, so efficient. Most oil ranges smoke or throw off a disagreeable odor. We guarantee that this will not. We guarantee further that you will find it a splendid cooker and baker. It bakes bread and pastry, roasts meat and fowl to perfection. Special features, to be explained hereafter, make it most economical. Furthermore, it reduces your kitchen work materially. No fires to make, no coal to carry, no ashes to empty. It is a real time saver, labor saver and money saver. And to make buying easy for you, we have reduced the first payment on this range.

Double Duty! The big economy features of this range are the patented Heat Collector and Intensifier, and the Giant burners. The flame from the burner heats the front hole and the patented heat collector carries surplus heat, usually wasted, back to the rear cooking hole, where it does effective auxiliary heating. Thus you get double value from every drop of fuel. The "Oil King" burns kerosene (coal oil), the cheapest fuel obtainable. You can buy it anywhere. Under the cooking holes there are two Super-Giant automatic burners, which give the most intense heat of any burner made. They reduce by fully 25 per cent the time consumed by ordinary burners in cooking. Under the oven there are two regular burners. We use regular size burners there, as giant burners for the oven would make it too hot for ordinary baking. (No heat collector on oven burners).

Another Feature which increases the effectiveness of the "Oil King" is the "Flame-within-a-Flame." Asbestos rings give a hot blue flame which heats the entire surface of the vessel, instead of heating only a ring around the edge, as the old style wicks do. These asbestos rings give a steady, intensely hot flame, require no cleaning, and can be replaced at 35¢ per set of four.

Snowy White porcelain enamel splasher, burner drums and oven door panel are set off by highly polished, silvery nickel trimmings. The body is black Japanned, a permanent luster which contrasts richly with the white enamel portions. Enamel will not peel or crack—easy to keep clean.

Finest Construction. The very best materials are used throughout, with superb construction guaranteeing absolute dependability. The full cabinet body is closed on three sides, keeping all drafts away from the burners. The cooking top has twice the capacity of the ordinary oil range. If it becomes crowded, when you are preparing a huge meal, you can remove the oven racks and bottoms and use the oven burners for cooking also. This top is the heaviest and strongest of all oil ranges. Front grates of heavy special heat resisting steel, back grates of cast iron—for lifetime service. The large neck glass oil tank can be refilled without a funnel. It maintains an accurate, visible oil level at all times. Held securely in place and can't be knocked off.

The Built-In Oven is stationary. Cold air cannot circulate around or in back of it to retard baking. Has adjustable wire rack and a flame spreader which assures even heating. Equipped with glass oven door which permits you to watch your baking without opening the door. Large size—will accommodate big roasts with ease. You'll be delighted with the baking and roasting qualities of this range. Big, juicy roasts—flaky pastry—biscuits with tops a beautiful golden brown—perfect baking satisfaction! Until you use an oil range with built-in oven, you have no idea the difference it makes in baking results.

Right Or Left hand oven—please state which you desire. Range with oven on the right is shown in large illustration above. Small view to the left shows range with left hand oven. Some housewives prefer one—some the other. Order whichever will be the more convenient. Let us ship this range to you for 30 days Free Home Trial. Cook 90 meals with its speedy, efficient assistance. See for yourself that it's a regular $65 range. If it does not please you, return it. We will refund your first payment and transportation charges both ways. If you keep it, pay only $4 monthly. We Could Give You No Finer Quality If We Doubled the Price

Easy To Light And Easy To Regulate. Burns Kerosene. Bakes And Cooks Quickly, Efficiently And Perfectly. Large Cooking Surface With Double Row Of Cooking Holes. Roomy Shelf To Keep Food Warm.

Spear's Oil King. The most efficient, the most easily regulated oil range on the market, was designed and perfected especially for our trade. Smokeless, odorless and simple to operate, it is by far the best range of its kind. You can cook or bake on it as well as you can with a coal, wood or gas range.

Two Big Features of this range are the Giant Burner and the Patent Heat Collector and Intensifier. The Giant Burner gives the most intense heat of any burner manufactured. It reduces by fully 25% the time consumed by ordinary burners in boiling water, etc. It is also interchangeable with any of the regular burners furnished with the stove. The Heat Collector and Intensifier is a feature found exclusively on this range. It does double the work with the same fuel. The flame heats the front hole and the Patent Heat Collector or Flue carries the surplus heat to the rear cooking hole, where it does effective work the second time.

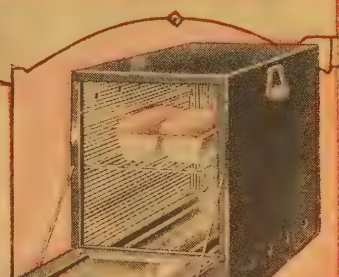

The Cooking Top is the heaviest, strongest and widest gauge special heat-resisting steel. The front row of grates is made of steel and is practically indestructible. The back grates are of cast iron and properly distribute the heat coming through the heat collector or flue. We guarantee these grates to last the life of the stove.

The Automatic Burners are simple in construction and efficient in operation. They are safe, economical, intensely hot, easy to light and quickly adjusted, with the "Flame-within-a-Flame" feature. Instead of having a circle of fire around the outside of the utensil only, these burners give a solid intense heat all over the bottom of the vessel. Asbestos rings replace the old style disagreeable wicks and give a steady blue flame and an equal distribution of heat. They require no cleaning and can easily be replaced at 35 cents, per set of four.

The Canopy is a big improvement over high shelves usually furnished with oil stoves. It is equipped with a perforated shelf, convenient for keeping dishes, pans, etc., warm. The shelf is hinged and when the oven is in use for baking or roasting can be raised out of the way completely. The canopy is constructed so that cooking odors are carried off up the flue, when connected to a chimney flue with 6-inch pipe. The Glass Oil Tank has a large neck and can be refilled without a funnel. It has also an automatic valve and maintains a correct visible oil level at all times. The End Shelf protects the glass tank and also provides a convenient extra space for cooking utensils, irons, etc.

The End Door Oven bakes evenly and is made expressly for this stove. Is placed endwise (as illustrated) over the two cooking holes, heated by one burner. It is made of uniform blue steel, with corrugated interior and lined with asbestos. It requires only half the fuel consumption and takes up only half the space, yet has identically the same capacity as the largest side-door two-burner oven. It is 20 inches high by 18 inches deep by 12½ inches wide. A very efficient baker and roaster. In a number of actual tests, this oven has baked light, tasty biscuits within 17 minutes from the time the burner was first lighted.

Two Sizes—Six Styles. You can buy this range in several different ways. It can be furnished with or without the canopy, with or without the oven, and with three or with four burners, as you prefer. See table below. This stove burns kerosene, the cheapest fuel you can buy. All stoves shipped from Pittsburgh warehouse and guaranteed to reach you in perfect condition. The baked-on gray enamel on the splashers and burners makes a striking contrast with the brilliant black enamel on the body of the stove. First payment, only $2.00.

A Full Size Oven Which Occupies Only Half the Space of the Ordinary Oven. Bakes Perfectly and Quickly with the Heat From Only One Burner. (Two Cooking Holes).

The GIANT

Mahogany or Walnut All Enamel

Handsomest Home Heater Made. Replaces 3 or 4 Ordinary Stoves! Extra Large Size—Full 48 Inches High—25 Inches Square—A Real Beauty!

The "Giant" is a beauty, to begin with. An ornament to any room. All Enamel finish—your choice of Mahogany or Walnut—it matches floors, woodwork and furniture. Massive proportions, glistening glass knobs, stately ornamentation! Easy to clean, easy to keep clean—simply wipe it off with a damp cloth. It is extra large—full 48 inches high by 25 inches square—but compact, giving 25% more heat than other circulators. Large feed door, 13x9 inches, makes stoking easy, while an automatic coal chute prevents spilling fuel. Patented smoke curtain prevents smoke escaping into the room. Plenty of room beneath the base to sweep under. None handsomer made!

Order Now On Trial!

Install the "Giant" in your home for only $5.00 with order. Use it for a month's free trial. See for yourself that it replaces three or four ordinary heaters—simplifies the job of tending the fire—simplifies house work because it's clean and easy to keep clean—saves on fuel. And it guards you and your precious little ones against the sore throats and colds that infest the home heated with ordinary heaters—homes that are too hot near the stove, cold and drafty on floors and in corners.

25% More Heat Radiation

25% more heat with the same amount of fuel. That's why the "Giant" is superior to other circulating heaters; why it's worth fully $50.00 more than our low price of $83.75. A glance at the small illustration shows how it works. All four sides, between the inner and outer cabinets, are left free for the circulation of air. Cold air, entering through the bottom, is heated by contact with the heavy inner heating unit of cast iron, and passes out at the top, being moistened on the way by the humidifier in the back of the cabinet. Once in the room, this warm air rises, forcing cooler air to the lower levels, where it is, in turn, drawn in and heated. Simple as ABC!

Extra Strong, Lasting Construction

The outer cabinet is made of 16-gauge rust-resisting steel. Heavily coated with purest enamel, choice of Brown Mahogany or Walnut finish. It does not become overheated, because it does not touch the inner heating unit at any point. The cast dome of the extra large inner unit is securely fitted to the steel body at the top, and cemented gas and dust tight. The main bottom is of heavy reinforced construction, and the base is cast iron. The big, self-cleaning fire pot is larger at bottom than at top, giving extra capacity and heat radiation surface. The construction of the "Giant" is far superior to ordinary heaters, and assures life-time service.

Easy To Regulate—Burns Any Fuel

The heavily constructed, four bar shaker grate of duplex type, burns hard coal, soft coal, wood or coke. The inner feed door is fitted with wheel check. Inner ash door, 6x14 inches, is fitted air-tight and has a draft slide through which ashes can be shaken. The large size ash pit is equipped with a big, bailed ash pan. 3-pint enameled humidifier can be refilled without removing. Reversible pipe collar takes 7-inch pipe. This is an extra large size home heater—48 inches high. Other heaters are only 42 or 43 inches high. Elsewhere it sells for $125 to $135.

Only $4.00 down, $4.75 monthly!

Bargain Price NOW $59.95

Regular $85.00 Value

Regular $85.00 Value

The "Torridair" is offered to you at a remarkably low price—only $59.95. This is made possible by our savings through buying in enormous quantities. Heaters of similar style sell for $90 to $100 elsewhere. We save you $30.00 to $40.00 on the purchase price. You make a further saving in the smaller amount of fuel necessary for this heater. We give you credit, too.

Heats Several Rooms

The "Torridair" is more than a stove. It is a home heater which heats 2 to 4 rooms by the circulation principle, just as a warm air furnace does. It replaces two or three ordinary heaters—burns hard or soft coal, coke or wood—provides healthier heat with ideal humidity—saves on equipment, fuel and attention—and is a joy to behold! Mica panels in the feed door give the cozy effect of a fireplace. The elegantly designed cabinet is finished in either Walnut or Mahogany Porcelain Enamel, to match the finest wood furniture. Please state finish desired. This glossy enamel finish does not crack, chip or peel. No tiresome polishing—easily and quickly cleaned with a damp cloth! An elegant finish—beauty that won't wear off!

Cast Iron Heating Unit

What you cannot see in the illustration, is the scientific, honest construction which makes the "Torridair" a healthful and efficient home heater. The large size heating unit is all cast iron. The exterior is cast iron on the bottom, front and top; and Armco enameling iron on back and ends. Made to last a lifetime! The removable duplex grates burn wood, coal or coke, and can be shaken from outside, without opening any doors. All doors and the sliding draft are closely fitted to insure perfect fire control. The sliding draft control is conveniently located on the ash pit door. The extra large feed door, 16x10 inches, makes it easy to stoke the fire. The big ash pit door is 18x7¾ inches. Has large bailed ash pan. The "Torridair" takes a 7-inch pipe. With each heater we send a cast iron elbow, fitted with a check draft, to enable you to run the smoke pipe up to a flue. The "Torridair" stands 43 inches high and requires floor space of 25x17 inches—a big, compact size.

Healthy Air—Healthful Heat

The small illustration shows how the "Torridair" works. The inner heating unit of cast iron does not touch the outer cabinet, leaving back and sides free for circulation of air. Cold air enters through openings at the bottom. It is warmed by contact with the cast iron heating unit and passes up through the ornamental grill at the top, being moistened on the way by the humidifier. When it escapes into the room, this warm air rises, following Nature's Law, and forces cooler air to the lower levels, where it is in turn drawn into the "Torridair" and heated. Thus you have at all times a healthy circulation of warm, moist air throughout several rooms. In consequence, the house will be pleasanter and more comfortable, the whole family's health will be better than in a stove heated home.

Removable Humidifier

The humidifier is a ½-gallon, porcelain enameled pan which fits into the top, under the ornamental grill. It can be refilled without being taken out, but it is removable for cleaning. Just keep it filled with water and you are sure of moist, healthful heat at all times. Proper humidity means greater comfort and better health.

Heats Several Rooms By Circulation Of Warm Air. Terms: $4.00 Down, $4.75 Monthly.

The "Torridair" is an enconomical fuel user, thanks to its scientific construction and large size, cast iron heating unit. It uses much less fuel than would the number of stoves necessary to take its place. Thus you effect a double economy, to say nothing of the saving in time and labor to the housewife who must keep the heater going during the day. The "Torridair" requires very little attention. You can bank it at night, like any stove, and in the morning have glowing coals in an instant. By actual test the "Torridair" has held fire for 24 hours. Poker, shaker and cast iron elbow with check draft are included. Our price of $59.95 saves you $30. Order this wonderful heater on 30 days Free Home Trial. BIGGEST BARGAIN and Best Seller We Have

A Handsome Parlor Heater With Efficient Hot Blast Attachment. All Cast Iron, Built For Lifetime Service. Burns Hard Coal, Soft Coal Or Wood. Truly A Most Sensational Bargain At This New Low Price.

Your Credit Is Good at Spear's. Use It!

The "Ajax" —the very last word in parlor heaters! Large, handsome, elaborately trimmed with polished nickel, it is an ornament to any home. Its big radiating surface and the hot blast feature make it wonderfully efficient, while saving on fuel at the same time. The body is made of Wellsville polished steel, corrugated, bolted and cemented air-tight to the heavy cast iron top and bottom frame. Fully enclosed, cast iron lined firebox, of the same type used in the most expensive heaters, prevents ashes or dirt sifting into the room. Clean as well as handsome—the perfect parlor heater!

Hot Blast Attachment. On ordinary stoves, a large portion of the gas formed by combustion goes up the chimney unused. In the "Ajax," the hot blast attachment traps this gas, which is then thoroughly consumed by being converted into extra heat, thus effecting a big saving in fuel. A heat reflector in the back of the stove throws the heat forward, adding greatly to the heating capacity of the "Ajax." **These features will cut down your coal bills!**

A Cheerful Stove. The big ash pit has a heavy, bailed ash pan, and the door is furnished with nickel screw draft dampers. Doors, swing top and swinging cover have Alaska never-hot handles. Other special features are the reversible pipe collar, sliding check draft in the collar, cooking lid, and cast iron front, top and base. The silvery nickel trimmings, including the urn, swing top, top reflector, top band, side pilasters, foot rails, ash guard shelf, screw draft, name plate and door handles, are guaranteed not to chip, flake or peel. One of the most delightful things about the "Ajax" is the cheery glow of the fire, as seen through mica windows in the feed door. The mica is protected against large chunks of wood, etc., by heavy metal gauze. It reflects the glow of the fire into the room, giving the coziness of a fireplace without dirt or soot.

Burns Anything. A modern revolving, duplex grate, and heavy, fully lined cast iron fire chamber make it a good coal burner—either hard or soft coal. The large firebox top feed and the big front feed make it convenient for feeding chunks or blocks of wood and getting the most heat from the least fuel. Here's a real two-in-one heater. Its heating capacity is tremendous, its saving in fuel extraordinary—its appearance beautiful, its features numberless—the "Ajax" is an ideal heater in every way! Lavish use of highly polished nickel trimmings—massive proportions—a big, mica-paneled feed door—these are the distinguishing features of a fine parlor heater. The "Excella" is expressly designed for those who want a satisfactory heater at a low price. It is built on Colonial lines with rich silvery nickel trimmings. The body is made of the best grade polished sheet steel, securely bolted to the front, fire pot and top, making practically air-tight construction. Nickeled parts are urn, top ring, side pilasters, foot rails and dampers.

The Grate is the approved draw center type, insuring ease in cleaning and removing clinkers. It is of heavy construction and durable—scientifically designed to give proper combustion. The fire pot is made of cast iron of the highest grade and is properly constructed to give splendid service for the life of the stove. The ash pit has a close fitting door with lever turnbuckle handle and screw damper for regulating the draft. The feed door also is equipped with a handy lever turnbuckle handle and screw draft. The "Excella" will burn hard coal, soft coal or wood with equally satisfactory results.

The Base Strips are firmly bolted to the feet of the heater, making much more substantial construction than in the ordinary low priced heater, where feet are simply bolted to the bottom. The bottom of the "Excella" is made of cast iron, far superior to the usual steel bottom. Features like these make the "Excella" stand out as a leader in value among low priced heaters. It will pay you to order this inexpensive heater for a month's Free Home Trial.

Warmth and Comfort radiate from the "Excella"! It will keep the floor and corners of the room warm in the coldest weather. Be sure to order a size large enough to meet your requirements. A stove with a large fire pot burns less fuel and radiates more heat in proportion, than a smaller size heater. Order the "Excella" on 30 days Free Home Trial. After using it a few days you will realize what a real value it is for the money. While it is not so large and has not the heating qualities of our higher priced heaters, it is a splendid buy, in a low priced stove. Send only $1.00 with your order for the "Excella" Colonial heater in any size. If you decide to keep it, take nearly a year to pay! Our guarantee is your protection—your money and all transportation charges will be refunded if you are not thoroughly satisfied. Shipped direct from Southern foundry to save you freight.

SAVE time—save money—save wear and tear on your clothes—and, most important of all, save your own health, by ordering this perfected new "Economy Electric" today. Send only $5.00 with order. Try it out with four weekly washings. Pay just $6.25 a month. The cost of operation will be less than 5c a washing! Your wash will be on the line by 9 o'clock, white as snow. Even the daintiest garments are not injured in any way.

Operation. This machine operates by the time-proven "agitation" principle. The speedy reversing action of the aluminum dolly agitates the clothes and sends them surging through the hot soapy suds, driving them against the corrugations in the sides and bottom of the tub. This produces an action similar to rubbing by hand, but far easier on the clothes. The aluminum dolly, with its numerous perforations, is so smooth that it is impossible to wear or tear the clothes.

Interior View Of Tub, Showing Corrugated Sides and Bottom.

The Tub is made of selected Southern Red Cypress, "the Wood Eternal." Bottom and sides are deeply corrugated on the inside. The thick wooden walls hold the heat, keeping your water hot far longer than the ordinary machine. Tub is easily cleaned with a dash of clear water. Has reinforced, 2-ply lid. Capacity, 6 sheets. A short hose can be attached to drain in bottom of tub, to conduct waste water to cellar drain. Legs equipped with ball-bearing casters.

The Motor is standard ½ horse power, mounted under the tub, where it is out of the way, amply protected, and cannot be splashed. All moving parts are completely enclosed—absolutely safe for children. The motor has ample power to operate washer and wringer at the same time. Has 8-foot waterproof connecting cord with attachment plug. Simply screw it into socket, turn on current and start washing.

Worm Drive. The construction of this worm drive electric washer is the same as that used in the best auto trucks. The worm gear runs in a bath of oil, in an oil-tight, dirt-proof housing. Requires no attention.

The Wringer is rustless metal, with high-grade 12-inch rubber rolls. Reversible water board permits wringer to be used from either side. Safety pressure release within easy reach, instantly releases pressure on the rolls. The wringer swings into four positions and cannot swing while wringing. A finger touch on the control lever stops, starts, reverses or locks the wringer instantly in any position. Machine and wringer may be operated at the same time or separately. Every bit of wringing, from tub, through the rinse, to bluing, is done by electric power.

Any Current

The "Economy Electric" is equipped for 110-volt, 60-cycle alternating current, 110-volt direct current, or 32-volt direct current, the latter being used with Delco, Powerlite and other farm lighting systems. Be sure to state kind of motor required. Your Electric Light Company will give you this information if you do not have it.

30 Days' Free Trial. Use the "Economy Electric" at our risk for a month. If it does not delight you, return it and we will refund your first payment and all transportation charges. It is in every respect a regular $120.00 machine. Shipped from Southern Ohio factory, set up in strong crate; weight, 120 pounds. Take off the crate and the machine is ready for use.

Saves Time, Strength and Money

Spear's Easy Running "Happy Hour" Vacuum Washer. Cleans Without Pounding or Rubbing.

The Vacuum Principle of the Happy Hour Vacuum Washer makes it supremely efficient. It cleans clothes not by pounding or rubbing, but by sending the air and hot soapy suds through the clothes again and again. The vacuum cups move up and down and also around in a forward oscillating motion, creating a suction which literally sucks the dirt of the clothes, without in the least damaging the finest fabrics. With the "Happy Hour" a washing is done with the least possible time and effort. Do not wear out your strength, your clothing and linens by washing the old fashioned way!

Easy Running. No elbow grease is required. A tub full of clothes only makes the "Happy Hour" run 5 per cent heavier than when empty. Its patented, ingenious, trouble-proof construction and mechanism make it no effort at all to run. The handle connects with the meshed gears and fly-wheel. These in turn operate the dolly shaft, to which the vacuum cups are attached. This makes the smooth finish cups move up and down and around in a forward oscillating motion, creating a strong suction and driving the hot soap suds through and through the clothes, cleaning them thoroughly.

Special Features. The vacuum cups and the dolly shaft are suspended from the lid and lift out with it. There is no other post in the tub to tear or tangle the clothes. Clothes always remain on top, no matter how full the tub.

The Gears are fully housed and protected—no danger of catching the fingers. These superior gears are cut and redressed by milling, which makes them operate much easier. The fly-wheel going at a high speed makes machine work faster, easier and better.

The Tub is made of everlasting Louisiana Red Cypress. It is corrugated inside. The exterior is finished with several coats of waterproof varnish. This tub will hold six full size sheets or their equivalent. The diameter at the top, inside, is 21 inches and the height of tub to the lid is 29 inches. The lid lifts easily—a large spring at the side carries the load. All metal parts have a rust-proof, long lasting, electro-galvanized finish.

Reinforced. Interlocked cross braces, connected from leg to leg, reinforce the under construction so that you can safely move this machine across the floor, fully loaded—something you can't do with every machine. Metal floor strips on the left hand side brace and balance the machine and keep it steady when operating.

"Valiant" Repeating Shot Gun

7 Days' Free Trial! Easiest Action! Perfect Safety!

Six Shots in 10 seconds! No stopping to re-load, while your covey of quail gets out of range! No wonder hunters everywhere are carrying repeaters nowadays! To get more game—and for greater convenience! The "Valiant" Repeating Shot Gun is a genuine Browning model, with the easiest action of any repeater made. Hunters like it because it is so perfectly balanced, simply constructed, and easy to operate. The breech bolt travels in a straight line with less friction and less effort than on any other repeating shot gun.

Safety Features without parallel! Solid breech gives a thick wall of steel behind the locked breech bolt, protecting the shooter perfectly. A large square lug through block and top of frame makes the strongest lock of any repeater made, capable of withstanding the heaviest loads. It is impossible to discharge gun before it is closed and locked—because a screw down lock on takedown device locks barrel tightly on frame. Safety lock in easy reach just ahead of the trigger. You can keep the "safety" on until you raise the gun to fire.

Real Quality. The "Valiant" is highest quality throughout, from the genuine walnut stock, with checkered decoration, to the tip of the highly polished, carefully bored barrel. Both barrel and frame are highly polished and blued, to prevent sun glare. Simple construction—gun can be taken down and re-assembled in about ten seconds. Just unscrew the magazine and slip the gun apart. No complicated mechanism! Nothing to jam or stick! Actual weight, 7¾ pounds.

Fully Tested. In an actual test the "Valiant" Repeating Shot Gun was fired 100,000 times with heavily loaded shells. Its condition was perfect at the finish.

Also Furnished with raised matted top rib extending the full length of the barrel, No. B2542 and No. B2543. Many hunters demand this feature, which gives an unobstructed plane and facilitates quick, sure sighting. Also helps prevent sun glare on the barrel, and adds to the handsome appearance of the gun. Whether you order the "Valiant" with or without the raised matted top rib, we guarantee it absolutely! Sent from Pittsburgh on 7 days Free Trial. Satisfaction or your money back! Information About Freight Rates

Because of the very small percentage of profit we make, it is impossible for us to pay the freight. Our customers always pay the freight charges when they receive the goods, but if there is no freight agent at your station, it will be absolutely necessary to send enough money with your order to prepay the charges. Always make a liberal allowance for these charges, and if there is any balance after we pay the freight, we will return it to you, or credit your account.

All goods are packed and shipped so as to secure the lowest possible freight rate. Your local dealer will sell you goods delivered to your home free of transportation charges, but always remember that his lines are limited, and that he always pays freight when buying his goods, the same as you do, and naturally has to include these charges in figuring his selling price. Even after you pay freight charges, we guarantee you will save 25 to 40 per cent when buying from us.

Pittsburgh Centrally Located. We desire to call your particular attention to our advantageous location for shipping. Pittsburgh, by reason of its ideal railroad connections, is more centrally located than any similar city in the United States. Shipments from Pittsburgh reach their destination on through trains with the least possible delay. Pittsburgh handles an enormous freight tonnage annually.

Freight Classification. We always pack and ship our goods so as to secure the lowest possible freight rates. Railroads charge for freight according to classification, and the classification of the article changes in different sections of the country.

Eastern Classification. If you live in any of the following states use the column marked "East" in "Table A" on Page 140: Connecticut, Delaware, District of Columbia, Indiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Western Classification. If you live in any of the following states use the column marked "West" in "Table A" on Page 140: Arizona, Arkansas, California, Colorado, Idaho, Illinois, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, N. Dakota, Oklahoma, Oregon, S. Dakota, Texas, Utah, Washington, Wisconsin, Wyoming.

Southern Classification. If you live in any of the following states, use the column marked "South" in "Table A" on Page 140: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee.

How To Figure Freight. Three essential points to be remembered in figuring freight charges: Weight of Article ordered; Classification of Article ordered; Freight Rate per 100 pounds, to point of destination on Article ordered.

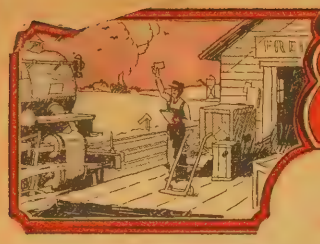

See Tables A and B. By referring to "Table A" on Page 140 you will find the "class" of the article you desire, then turning to "Table B" you will find the rate per 100 lbs. to your town, or the town nearest you. Then multiply the rate by the weight of the article which is given in the Catalog description and you can estimate the charges within a few cents.

An Example. We will say you live in Columbus, Ohio, and you desire to purchase a writing desk, shipping weight 100 lbs. By referring to "Table A" you will note that desks take a 1½ class rate in Ohio, which is in the Eastern classification.

Then look at "Table B"—look for Ohio—find Columbus. The first-class rate to Columbus is 72 cents per 100 lbs. But the actual rate is 1½, therefore 72 cents multiplied by 1½ is $1.08 which is the cost of shipping the desk to Columbus, Ohio. The rates quoted are those in effect March 1st, 1928.

Freight Charges Are Low. Do not worry about the freight charges. Remember we guarantee to save you money even after you have paid freight charges. Whether you buy your goods in your home town or have them shipped from Pittsburgh or our factories, you always pay the freight charges, as the small dealer has to include these charges in his selling price.

It is not necessary to write us for freight rates, as the following table gives these rates to different points in the United States. If your town is not given in the table, take the town nearest to it. The rate per 100 lbs. is almost the same.

This range is built to our own specifications. You need only compare it, finish for finish, feature for feature, its marvelous cooking, baking and roasting qualities, with any other range on the market, to discover that it is a superb value at our unprecedented low price. We have made a special first payment—only $5.00 —on our "Ambassador Plymouth," for your convenience. Take more than a year to pay!

Large Cooking Top

The cooking top is ground and highly polished. To clean it, simply wipe with a soft cloth—no polishing required. It is made in sections to allow for heat expansion and to prevent warping. Has six 8-inch lids. One lid is the sectional type and another is the convenient anti-scorch cover which absolutely prevents slow cooking foods or cereals from burning. Extra large top, 52 inches wide.

Scientific Construction

The fire box is large size and has heavy, sectional, cast iron linings with reversible duplex grates. It burns hard coal, soft coal or wood and is scientifically built to use but little fuel. The heat is easily and quickly regulated by a direct draft damper and draft slide. L-shaped water front to fit, $8.25 extra.

8-Gallon Reservoir

The pure copper, 32-quart reservoir is guaranteed never to rust or leak. It heats by contact. A reservoir of this type and size means plenty of hot water. It heats water quickly and keeps it hot. When range is ordered without reservoir, a handy end shelf is included in its place.

Big Oven With Thermometer

The oven door has the latest type thermometer, absolutely accurate and dependable, enabling you to gauge your roasting or baking scientifically and absolutely preventing failures. The warming closet doors are drop style, serving also as shelves.

Handsome Nickel Trim

The polished silvery nickel trimmings include towel bar, towel bar hangers; high closet brackets, closet doors and door knobs; draft door knobs and pouch feed door handle. Handsomest range made! "The King Arthur" Console Phonograph With Coat-of-Arms Decorations. Has Perfected New Reproducer. A Regular $85.00 Instrument For $49.95!

Fit for a King! American perfection of tone reproduction and inner construction—combined with the courtliness of the Tudor Period style. The "Mello-Phonic" is new—yes—but it is not an experiment. It is the triumph of years of experience—the latest and greatest achievement of a nationally famous company. It has genuine, *built-in* quality to begin with, and in addition it has every desirable feature any instrument can give you. Last of all, for the "King Arthur" we have chosen a console cabinet modeled exactly after one specially designed for the castle of an English Earl. It is in Tudor Period style, reminiscent of the age of chivalry. A coat-of-arms in rich colors, taken from the Book of Heraldry, decorates the two-tone panel doors. No matter what you pay, you can't buy better appearance or tone! And no matter where you buy, you can't possibly equal Spear's low price and Spear's easy, confidential Year-to-Pay Credit. Only $3.00 down and $4.00 monthly for this fine instrument!

Radio Adaptable Cabinet

The "King Arthur" is radio adaptable, of course. Who would buy a phonograph today without that essential feature? Simply take out the removable shelf and you have storage space in the lower left compartment for all your batteries. Eliminates the unsightly clutter of batteries in the living room—and gives your batteries perfect protection! Takes 10 minutes to arrange—simple as ABC!

Truly a treasure chest of pleasure! Superb in appearance—superior in performance. The radio section houses your batteries; the phonograph gives you any kind of music, whenever you want it. The elegant Tudor Period style cabinet brings beauty into any room. You will never tire of the exquisite, velvet lacquer finish in two-tone effect, nor the rich and colorful decorations. Here is a glorious phonograph, perfect in every detail, in Genuine Walnut or Mahogany finish, with perfected new type reproducer—an $85.00 instrument for only $49.95.

NEW Type Reproducer

The New Mello-Phonic has the new type reproducer. It gives the full, clear, mellow, marvelously distinct tone necessary for the proper rendition of "Jazz," dance music or popular songs; and in addition it can be modulated, simply by opening or closing the doors, to render olden ballads, sacred hymns, soaring vocal solos, throbbing violin music, with all of the sweetness and heartbreaking tenderness that make old songs, old tunes the best after all.

With the New Mello-Phonic the golden voices of the world are *yours* to command. Galli-Curci—McCormack—Sousa's Band—Paul Whiteman's Jazz Orchestra—Million Dollar Music Makers—*YOUR* servants!

Double spring motor, noiseless, guaranteed, plays any disc record made—6 10-inch records on one winding! A real convenience—saves you the bother of frequent rewinding! Tone arm and grill front tone chamber improved to Scientific Perfection!

Walnut or Mahogany Finish

You may choose between Genuine Brown Mahogany or Genuine American Walnut. Finest matched 5-ply veneers on top and front, with ends and back of selected seasoned hardwood. The "King Arthur" is an ideal size, 33 inches high, 32 inches wide and 19 inches deep over all. The lids, when raised, lodge securely in place.
